

RAYC

Rayliant Quantamental China Equity ETF

Data as of 31 October 2023

Investment Strategy

The **Rayliant Quantamental China Equity ETF** is an active, systematic approach to harvesting behavioral alpha by exploiting mispricings among Chinese stocks. The strategy is localized to China, applying specialized data and signals that capture unique features of Chinese markets, including novel aspects of China's accounting, regulations, market structure, state ownership, and investor behavior.

Sectors

CSI 300 is a capitalization-weighted index designed to track the performance of the largest 300 stocks traded on the Shanghai and Shenzhen Stock Exchanges. It is not possible to invest directly in an index. Index performance returns do not reflect any management fees, transaction costs or expenses. Indices are unmanaged.

Rayliant Quantamental China Equity ETF

Important Information

The investment research used to develop RAYC's China strategies is conducted by both the Adviser and its affiliated entities. The researchers identified in this fact sheet may be employed by either the Adviser or an affiliate.

Risk of Investing Investing involves risk, including the risk of total loss of principal. Please consider the following risks before investing in the ETF.

Active Management Risk The Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect.

Sector Risk The Fund may be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors.

Smaller Companies Investments in smaller companies typically exhibit higher volatility.

Diversification The ETF is not diversified.

Quantitative Investments Investments that are managed according to a quantitative model can perform differently from the market as a whole.

International and Emerging Markets International markets involve political, social, economic and currency risks. These risks are heighten in emerging markets, which also include the risk of increased volatility and lower trading volume. Securities focusing on a single country may also be subject to higher volatility.

Local Rules and Regulations Trading through Stock Connect is subject to a number of restrictions that may affect an ETF's investments and returns. China A Shares purchased by the ETF through Stock Connect are generally subject to Chinese securities regulations and listing rules, among other restrictions.

Before investing in any ETF, it is critical for investors to carefully consider the fund's investment objectives, risks, charges and expenses.

To obtain a full or summary Prospectus for the Fund, which contains this and other information, please visit <https://funds.rayliant.com/rayc>

Please read the Prospectus carefully before investing.

The Rayliant Quantamental China Equity ETF is distributed by SEI Investments Distribution Co., which is not affiliated with Rayliant Asset Management, the Investment Adviser.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. The returns shown do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time.

Definition of Terms

Weighted Average Market Cap

The average market capitalization of all companies in a fund/index, with each company weighted according to its percent held in the fund/index.

Price/Earnings (P/E Trailing 12 Months)

P/E ratio is a ratio for valuing a company that measures its current share price relative to its per-share earnings (EPS) for the past 12 months. P/E ratios are used by investors and analysts to determine the relative value of a company's shares in an apples-to-apples comparison.

Price/Book (P/B)

P/B measures the market capitalization of a company relative to its book value of equity. Widely used among the value investing crowd, the P/B ratio can be used to identify undervalued stocks in the market.
