

RAYE

Rayliant Quantamental Emerging Market ex-China Equity ETF

Data as of 31 March 2024

Investment Strategy

The **Rayliant Quantamental Emerging Market ex-China Equity ETF** is an active strategy that employs big data and sophisticated quantitative models to identify investment opportunities in emerging market (excluding China) stocks traded around the world. The resulting portfolio is designed to capture emerging markets ex-China growth, reduce risk, and exploit behavioral bias to outperform a passive approach.

Important Note: As of Oct. 24, 2023, the name, strategy and benchmark changed to exclude China securities.

Performance (as of 31 March 2024)

		RAYE	MSCI EM ex China*	Excess Rtn

***Note:** The benchmark depicted in the table is a linked benchmark, representing the performance of the MSCI Emerging Markets Index from the Fund's inception, through Oct. 23, 2023, and the MSCI Emerging Markets ex-China Index thereafter. On Oct. 24, 2023, the Fund underwent a strategy change from a global Emerging Markets strategy to an Emerging Markets ex-China strategy, at which point the Fund's benchmark changed, accordingly.

The performance data quoted represents past performance. Past performance does not guarantee future results. Performance for periods greater than 1 year is annualized. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 866-898-1688 or visit <https://funds.rayliant.com>.

The MSCI Emerging Markets ex China Index captures large and mid-cap representation across 23 of the 24 EM countries. With 672 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. It is not possible to invest directly in an index. Index performance returns do not reflect any management fees, transaction costs, or expenses. Indices are unmanaged.

Important Information

Risk of Investing

Investing involves risk, including the risk of total loss of principal. Please consider the following risks before investing in the ETF.

Investment Objectives

There can be no assurance that an ETF will achieve its stated objectives.

Smaller Companies

Investments in smaller companies typically exhibit higher volatility.

Quantitative Investments

Investments that are managed according to a quantitative model can perform differently from the market as a whole.

International and Emerging Markets

International markets involve political, social, economic and currency risks. These risks are heightened in emerging markets, which also include the risk of increased volatility and lower trading volume.

Active Management Risk

The Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect.

New Fund Risk

Because the Fund is new, investors bear the risk that it may not be successful in implementing its investment strategy, employ a successful investment strategy, or may fail to attract sufficient assets under management. This could result in the Fund being liquidated at any time.

Reasonable Care

While reasonable care has been taken to ensure the accuracy of the information in this document, Rayliant does not give any warranty or representation, expressed or implied, and expressly disclaims liability for any errors and omissions. Information and opinions may be subject to change without notice. Rayliant accepts no liability for any loss, indirect or consequential damages, arising from the use of or reliance on this document.

Intellectual Property

This document is issued by Rayliant Investment Research d/b/a Rayliant Asset Management ("Rayliant"). Unless stated otherwise, this document, including all names, trademarks and logos used in this material are the intellectual property of Rayliant.

Rayliant's EM Philosophy & Process

Based on billions of data points and covering thousands of stocks around the world, Rayliant's systematic approach to building equity portfolios is anchored in a deep understanding of human behavioral bias and fundamental thinking about what drives global stocks.

Before investing in any ETF, it is critical for investors to carefully consider the fund's investment objectives, risks, charges and expenses.

To obtain a full or summary Prospectus for the Fund, which contains this and other information, please visit <https://funds.rayliant.com/raye>

Please read the Prospectus carefully before investing.

The Rayliant Quantamental Emerging Market ex-China Equity ETF is distributed by SEI Investments Distribution Co., which is not affiliated with Rayliant Asset Management, the Investment Adviser.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. The returns shown do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time.

Definition of Terms

Weighted Average Market Cap

The average market capitalization of all companies in a fund/index, with each company weighted according to its percent held in the fund/index.

Price/Earnings (P/E Trailing 12 Months)

P/E ratio is a ratio for valuing a company that measures its current share price relative to its per-share earnings (EPS) for the past 12 months. P/E ratios are used by investors and analysts to determine the relative value of a company's shares in an apples-to-apples comparison.

Price/Book (P/B)

P/B measures the market capitalization of a company relative to its book value of equity. Widely used among the value investing crowd, the P/B ratio can be used to identify undervalued stocks in the market.
