RAYD

Rayliant Quantitative Developed Market Equity ETF

Data as of 31 Dec 2024

Investment Strategy

The **Rayliant Quantitative Developed Market Equity ETF** is an active strategy, applying advanced quantitative methodology to identify investment opportunities in the US and other developed stock markets around the world. The resulting portfolio is built to achieve broad equity exposure, with lower risk and enhanced returns relative to a traditional passive approach.

As of 31 Dec 2024	NAV	9.44%	7.38%	+2.06%

The performance data quoted represents past performance. Past performance does not guarantee future results. Performance for periods greater than 1 year is annualized. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more of less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 866-898-1688 or visit https://funds.rayliant.com.

Important Information

Risk of Investing

Investing involves risk, including the risk of total loss of principal. Please consider the following risks before investing in the ETF.

Investment Objectives

There can be no assurance that an ETF will achieve its stated objectives.

Smaller Companies

Investments in smaller companies typically exhibit higher volatility.

Quantitative Investments

Investments that are managed according to a quantitative model can perform differently from the market as a whole.

International Markets

International markets involve political, social, economic and currency risks.

Active Management Risk

The Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect.

Reasonable Care

While reasonable care has been taken to ensure the accuracy of the information in this document, Rayliant does not give any warranty or representation, expressed or implied, and expressly disclaims liability for any errors and omissions. Information and opinions may be subject to change without notice. Rayliant accepts no liability for any loss, indirect or consequential damages, arising from the use of or reliance on this document.

Intellectual Property

This document is issued by Rayliant Investment Research d/b/a Rayliant Asset Management ("Rayliant"). Unless stated otherwise, this document, including all names, trademarks and logos used in this material are the intellectual property of Rayliant.

Rayliant's DM Philosophy & Process

Based on billions of data points and covering thousands of stocks around the world, Rayliant's systematic approach to building equity portfolios is anchored in a deep understanding of human behavioral bias and fundamental thinking about what drives global stocks.

Before investing in any ETF, it is critical for investors to carefully consider the fund's investment objectives, risks, charges and expenses.

To obtain a full or summary Prospectus for the Fund, which contains this and other information, please visit https://funds.rayliant.com/rayd

Please read the Prospectus carefully before investing.

The Rayliant Quantitative Developed Market Equity ETF is distributed by SEI Investments Distribution Co., which is not affiliated with Rayliant Asset Management, the Investment Adviser.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. The returns shown do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time.

Definition of Terms

Weighted Average Market Cap

The average market capitalization of all companies in a fund/index, with each company weighted according to its percent held in the fund/index.

Price/Earnings (P/E Trailing 12 Months)

P/E ratio is a ratio for valuing a company that measures its current share price relative to its per-share earnings (EPS) for the past 12 months. P/E ratios are used by investors and analysts to determine the relative value of a company's shares in an apples-to-apples comparison.

Price/Book (P/B)

P/B measures the market capitalization of a company relative to its book value of equity. Widely used among the value investing crowd, the P/B ratio can be used to identify undervalued stocks in the market.
